

Meet the World Through Math

Global Math Challenge - an online math contest for math lovers worldwide

Test your math skills with the world, wherever you are.

Global Math Challenge is an online math contest designed and managed by Sony Global Education in partnership with the Japan Prime Math Olympic Committee. GMC gives you puzzles that stretch your mind and stimulate logical thinking - and is now open for all. Secure and easy to set up, it's a great way to boost your children's daily learning skills and share the excitement of math. Sign up today and Meet the World Through Math.

GMC Report

More than **250,000 challengers** from over **85 countries!**

Global Math Challenge has taken place bi-annually since November 2014, in Japanese, English and Chinese. In the last edition, more than 250,000 math fans from over 85 countries took part. The mathletes ranged from elementary school students up to the age of 79.

How were the questions?

Over 80% of challengers enjoyed the contest.

Comments from teachers about Global Math Challenge:

"GMC offers students the opportunity to tackle rigorous, real-world math problems, that challenge their mathematical thinking. One of the most impactful aspects of the competition is the question analysis students receive after taking the test. This is no ordinary math competition! It will stretch and grow even the highest achieving mathematical minds!"
Ms. Helton, Junior High School Teacher, USA.

"Discover the fun and mystery of mathematics with Global Math Challenge. Invite your classmates and take on the challenge together!"

Ms. Yanli, Elementary School Teacher,
Heilongjiang-province, China

"Full of fun questions for all. Give it a go!"

Courses

With Global Math Challenge, you can challenge your math skills with people all around the world. Select a course that best fits your level.

■ In the 5th Global Math Challenge, you can select one from the following 5 courses.

A Bunch of Grapes Course: Intermediate - Advanced

There are some fruits hanging on a pole: a bunch of grapes, a peach, a persimmon, a melon, a pineapple, an apple and a lemon. They weigh 144 g in total and are balanced as shown below.

How much does the bunch of grapes weigh?

Did you get it? Check the answer here: <https://www.global-math.com/pr/quiz/8>
